

ZigBee USB Dongle Sonoff CC2531

ZigBee USB Dongle Sonoff CC2531

Ref: 9888010100042

ZigBee USB Dongle Sonoff CC2531

The CC2531 dongle is an extremely useful and functional USB device that acts as ZigBee coordinator. It serves as a kind of starting node to which you can connect other IEEE802 compliant devices. Just plug it into your computer or laptop with your Home Assistant and enjoy a friendly user interface - the gateway also has the CC2531ZNP-Prod software loaded, which allows you to use the ZigBee2MQTT application.

Easy to set up

Z With the help of the device you can easily configure and control other compatible Sonoff ZigBee products in your home automation system. However, it is recommended to integrate the CC2531 dongle. The coordinator can handle up to about 30 devices.

Convenient Home Assistant control

After configuring the ZigBee coordinator, simply pair the selected devices with it. Once you have done this, you will have convenient access to information about the hardware, as well as the possibility to update its software. Home Assistant control has never been so convenient

Perfectly executed

The ZigBee CC2531 surprises with its very good range and well thought-out design. The dongle is equipped with 8 IO connectors, debugging port, voltage regulator and an inverted F antenna. All these components are distinguished by their excellent quality and ensure reliable operation of the coordinator.

User-friendly

The device has been additionally equipped with 2 buttons and LEDs, which indicate its operation. This makes operation even more simple and intuitive - in short, tailored to your needs.

Compact design

The coordinator has a small size and light weight of 6 g. Using its functionality is therefore very convenient. Its dimensions are only 5.6x1.6x0.7 cm. The dongle has no housing - you can buy it separately
