

Dashboard phone holder ESR HaloLock with Qi inductive charge

Dashboard phone holder ESR HaloLock with Qi inductive charger, MagSafe (black)

Ref: 4894240132845

ESR HaloLock suction cup car mount with Qi inductive charger, MagSafe (black).

Conveniently use navigation and charge your smartphone while traveling in the car! The car mount is designed to limit visibility while driving. It provides the necessary stability, and thanks to its strong magnets, your phone holds securely to the holder. It also allows wireless charging with a maximum power of up to 15W according to the MagSafe standard.

Convenient and fast charging on the go

Be assured that your smartphone will not discharge during a long car trip! The mount offers instant charging with up to 15W of power, so you can renew your phone's energy in just a few moments. What's more, you can freely charge your device both vertically and horizontally.

Reliable stability

Conquer even the bumpiest roads without worry! Equipped with strong magnets and a non-slip silicone ring, the mount provides an extremely stable hold - no more worrying about your phone falling and getting damaged. The adjustable arm adjusts to the curvature of the dashboard, so it won't restrict your visibility while driving.
