

## Replacement filters for Petoneer Smart Pet Fountain mini (2

Ref: 6930460005793

Replacement filters for Petoneer Smart Pet Fountain mini (2 pieces)

Replacement filters for Petoneer Fresco Mini Fountain

Already own a Petoneer Fresco Mini smart fountain and want to make sure your pet always has access to clean and bacteria-free water? Remember that it is recommended to change the filter at least once every 30 days. If you don't, it will gradually start to lose its effectiveness and no longer guarantee as thorough a purification as it did at the beginning. Avoid similar problems with this practical set! In the box you will find 2 replacement filters for the Petoneer Fresco Mini fountain.

Four filtration stages

Thanks to its unique filter design, the Fresco Mini fountain offers highly efficient 4-stage filtration. The first stage is the retention of larger particles by means of a special PP material. Next comes the filtration with a KDF filter, then the water is directed through an activated carbon filter and finally through an ion exchange resin filter. As a result, the fountain allows you to give your pets cleaner water that is free of germs, debris and bad odors, thus reducing the risk of disease.

Special reminder

Worried about forgetting to change the filter on your Petoneer Fresco Mini? Don't be! The drinker is equipped with an LED light that will

remind you. When it starts flashing blue, it means that the filter element has already been used for 30 days and needs to be replaced. In this case simply reach into the pack, take out the new filter and replace the old one!
