Sonic toothbrush with app and tip set, travel case and UV sterilizer S2+HD2 (black)

Sonic toothbrush with app and tip set, travel case and UV sterilizer S2+HD2 (black)

Manual tooth brushing is a thing of the past! Discover the Bitvae sonic toothbrush and experience an extraordinary feeling of freshness! This toothbrush, recommended by dental communities, is equipped with an ultrasonic motor and stands out with a long operating time. It offers 5 brushing modes and 9 intensity levels, and in each of them, an intelligent timer will accompany you, informing you about the need to change the brushing area. The set includes a UV sterilizer that allows you to remove even 99% of bacteria from the toothbrush, and also to safely and hygienically store several toothbrushes at once. You will also find replaceable heads in the package. With the dedicated app, you gain even more possibilities! Check out which ones! The working life of the toothbrush reaches 100 days, and you will renew its energy in just 4 hours!

More efficient tooth brushing

The ultrasonic motor that the Bitvae toothbrush is equipped with is distinguished by an incredible speed of 40,000 vibrations/minute. This ensures even more thorough removal of debris from the mouth. The smart timer used in the toothbrush will remind you every 30 seconds to change the brushed area, so you won't miss a nook or cranny! If you brush too hard, a red pressure sensor light will alert you - so you can forget about the problem of irritated gums!

Choose your favorite mode

The Bitvae sonic toothbrush offers up to 5 brushing modes and 9 intensity levels, so you're sure to find the perfect configuration for you! At your disposal are Clean, White, Soft and Smart modes. What this means. Whether your teeth are healthy and strong, or perhaps weak and sensitive, the brush will allow you to take care of your oral hygiene safely and effectively! What's more, the Gum Care mode provides gentle care for sensitive gums!

Say goodbye to bacteria

In the set you will find a specially designed UV sterilizer, whose multifunctional action will pleasantly surprise you. The main function of the device is to remove bacteria from the surface of toothbrushes using ultraviolet light. It only takes 10 minutes to remove as much as 99% of harmful particles, so you can be sure that you always reach for a hygienic toothbrush! You can store not only your toothbrush in the device, but also other household members. Mount the sterilizer on the wall and save space near the sink.

More possibilities with the app

Now you can do more! The dedicated iSpruz app will help you professionally take care of your teeth! It works with iOS and Android systems, and thanks to it, you will learn more about the health of your oral cavity. How does it work? The app monitors your habits, so it can adjust the brushing plan suitable for the chosen mode of operation. In your phone, you can easily check which areas of the oral cavity are worth brushing more thoroughly! Oral hygiene has never been easier! Additionally, the app will allow you to check the battery charge status. You can connect several Bitvae brushes to the app!

Practical accessories in the set

In the set you will find a number of useful accessories with which oral care will be even more effective! 8 tips is a set that will last for up to 2 years of brushing. Among them you will find tips designed for gum care and tongue cleaning. The set also comes with 2 USB cables, a power adapter, a case, a sterilizer and a sterilizer mounting kit that you can mount on the wall.
