

Smart night light NiteBird LB3 Tuya

Smart night light NiteBird LB3 Tuya

Ref: 6972391281242

NiteBird Smart Light - the efficient lamp you need

The NiteBird smart light can be controlled remotely using the corresponding app. It is also able to integrate brilliantly into the smart home environment. The device is also distinguished by voice control, scheduling, the ability to dim the light, a touch panel, as well as ease of use and variable lighting color.

Possibility of contactless control of the device

The lamp is compatible with Amazon Alexa and Google Assistant, providing the user with maximum convenience by allowing you to control the light through simple voice messages. With the help of commands, you can not only easily turn the device on or off, but also adjust the light to your needs, all the while lying comfortably in bed or on the couch.

Wake and sleep mode

You can start the light by default, or save the times you go to bed and get up in the device. When you do, the device will adjust to your day. In the morning it will wake you up with a pleasant bright glow, while in the evening it will soothe you with a relaxing white light that makes it easier to prepare for sleep.

Remote control and device schedule

Easily control the light using the Gosund app anytime and anywhere, even when you're away from home. Adjust the brightness of the light at your convenience or turn on/off the light in your child's room.

More than a lamp

The compact size and elegant design of the device allow you to incorporate it into an artistic decoration on the table. They also make the lamp fit perfectly into almost any arrangement in a contemporary home. The product blends perfectly with modern furniture and can become an excellent design element in your apartment as well.

Bring more color into your life

The NiteBird smart night light, can completely change our perception of the space. The RGB+W light mixing mode allows the user to create beautiful and stunning scenery. The NiteBird lamp is convenient to use thanks to its touch screen, universal switch, as well as white and RGB light modes.

Convenient touch panel

In the lamp, the standard buttons have been completely replaced by a more intuitive touch panel. This solution definitely makes it easier to operate it. Change the color or brightness - everything is done by touch. Simply press the top/side of the device to turn it on/off or switch the mode of operation. What's more, a gentle swipe on the bottom touch panel allows you to change colors and adjust the brightness of the light between 1%-100%.

Multiple applications

The device does not at all have to serve only as a bedside lamp in the bedroom. It will also work perfectly in other places. You can successfully place it in a children's room, bathroom, living room or kitchen. Due to the eye-friendly light it emits, you can also use it as a reading lamp.

A solution that does not require installation

Thanks to the solution used, the user no longer has to worry about installing software or other complicated operations. All you need to do is start the lamp with the included Micro USB cable, download the Gosund APP, add the device, adjust the settings to your needs and enjoy your new reliable light source!
