Ref: 6921002622615

Lightning Cable Mcdodo CA-2261, 1.0m (black)

Mcdodo Lightning cable CA-2261, 1.0m (black)

Now you can save time by charging your devices with Mcdodo. The CA-2261 USB to Lightning cable supports a current of 3A, providing fast and safe charging. It features a robust design and wear resistance, and provides broad compatibility with Apple equipment. The cable also allows data transmission at 480 Mbps.

Enjoy wide compatibility

USB-A to Lightning connectors make the cable great for when you want to connect your iPhone to various devices, such as PCs and powerbanks. Mcdodo provides automatic updates with the latest iOS systems, so the CA-2261 is fully compatible with them.

Security is key

Importantly for cables - the CA-2261 recognizes connected devices, ensuring that they are charged at the correct current. This solution keeps your devices' batteries in good shape and protects them from overcharging or overheating.

Even more durable

Mcdodo's cable guarantees reliability, thanks to a thickened copper core that provides high electrical conductivity, so charging takes place in a short time. What's more, the ends of the cable are extremely flexible, which means they are not afraid of bending or pulling.

The entire length of the cable is coated with a nylon braid, so it does not tangle and is resistant to wear and tear. Use as you like and don't worry about damaging the cable!

#### Instant data transmission

Don't like waiting for your files from your phone to rip to your computer? We do too, which is why the McDodo cable supports 480 Mbps transmission. In practice, this means that you will transfer a large 1GB file in just 30 seconds!

□Manufacturer

□McDodo
