Puluz PU5110 110cm 5in1 photo blenders

Photo blenders by Puluz are a great addition to your photography accessories. Improve the quality of your photos by relying on simple, proven solutions. You will use each blender in different situations, choosing the right one for the prevailing conditions or needs - both outdoors and indoors. Photograph like a pro!

5 colors - different applications

You'll use the golden blender to emphasize the warmth of colors and create a sunlight effect. It is ideal for portrait photography. The silver one, on the other hand, will make it easier for you to work in low-light environments. A white blender will give you a natural effect, a black one will reduce excess light, and a translucent one will help reduce contrast. Evaluate your needs and select a panel to make your photos look great - no matter the conditions!

4-layer construction

The blender is made up of 4 separate layers to most efficiently assist in achieving the desired effects. The base has gouges to provide a better diffused reflection effect. The next layer is a background that assists in achieving expressive color on the next level - high quality reflective paint. The whole is covered with a protective coating that effectively protects the rest from scratches.

Functionality and convenience

Blends are housed in a spring-loaded, sturdy frame, which is made of steel. This makes it easy to compress and expand the structure - according to your needs! What's more, the included case will ensure your convenience when moving it around. Be always prepared to arrange a photo shoot!
