### Liberex Electric Foot File CPR0002

Whether you're struggling with hard corns or want to keep your feet smooth, the CPR0002 electric foot file will help you achieve the results you want. The device allows you to adjust the speed, so you can tailor its action to your needs. It comes with two heads, and the LED backlighting will help you perform a precise treatment. The ergonomic design ensures comfortable use. Give your feet a home spa with Liberex!

### Different speed levels

The Liberex electric file offers two speed levels. The low speed is mainly for cosmetic use and is perfect for when you want to gently exfoliate your skin, smooth it and improve its texture. The high speed, on the other hand, provides more intense action and is dedicated to removing hard and stubborn calluses. With this solution, you can enjoy full control over your skin care ritual.

### Two heads included

To meet the different needs of users, the Liberex file is equipped with two heads - a coarse-grained and a fine-grained one. The first guarantees effective removal of thick and hard layers of keratinized skin, effectively eliminating excess dead cells and restoring smoothness to the feet. The second head, on the other hand, is designed for more subtle skin care and smoothing. It's ideal for delicate areas, and it works to soothe calloused skin and improve skin texture for smooth and beautiful feet.

#### LED backlighting

In order to ensure even greater precision during treatments, the Liberex file is equipped with LED backlighting. The solution used improves visibility and makes removing keratinized skin easier, and you can focus on every detail to get the skin care results you dream of.

#### User-friendly

With the Liberex file, you can take care of your skin in the comfort of your own home, saving time and eliminating the need to visit a beauty salon. To perform the treatment, simply select your preferred head, start the device and set the speed, then gently glide over the areas of your feet that need care. This advanced technology provides a controlled and precise action, eliminating calloused skin and making feet smooth and soft. In addition, disassembling the head is easy, and you won't have any trouble keeping it clean - you can wash it under running water without worry.

#### Ergonomic design and long working time

The well-thought-out design of the handle and the vertical shape of the device allow for precise operation, while providing comfortable use. The file will easily reach all areas of your feet, and you can use it without discomfort. What's more, thanks to the powerful rechargeable battery, the device can run for an hour on a single charge.
