Flashlight Superfire X60-T, 1500lm, USB

Superfire X60-T flashlight

The handy Superfire X60-T flashlight can shine at a range of up to 300m. It offers up to 5 operating modes, so you can easily adapt it to almost any situation. With an operating time of 3-8 hours and IP34 water resistance, it will surprise you with its reliable performance. It allows you to accurately illuminate both areas further away and objects or places close to you.

Shines brighter and farther away

The flashlight is equipped with a large lens for improved performance. The device can shine with high power and exactly the brightness you want. It also impresses with its huge range, which is up to 300 meters. This makes the X60-T ideal for many different situations. You can easily adjust its performance to your needs and make it perfectly illuminate things both far away from you and those right next to you.

5 lighting modes

Choose one of the available light modes to optimally match the flashlight's operation to the current situation. The X60-T can emit high or medium intensity light. The device also offers a power-saving and SOS mode. And if you find yourself in danger, you can also successfully use the flashlight to temporarily blind your attacker to gain time to defend yourself, escape or call for help.

It will also work well as a powerbank

The device has 2 USB ports. One of them is used to charge the flashlight, while with the help of the other you can easily and conveniently turn it into a handy powerbank. The X60-T will not only delight you with its long working time, but also allow you to charge your smartphone if necessary. An additional convenience is a practical indicator that will provide you with the necessary information about the state of the battery.

It is not intimidated by water

The IP34 protection rating means that you can use the flashlight in almost any conditions without worry. The device is equipped with a durable gasket that prevents water from getting inside. A light rain, an accidental splash, or even a sudden downpour - with the help of the Superfire X60-T you will find your way in the dark regardless of the situation.

Always at hand

The dimensions of the device do not exceed 15,8x4,1 cm, and it weighs only 190 g. Therefore, it is extremely handy - you can always carry it with you to use a reliable source of light when needed. Its transportation is facilitated by a special clip, with the help of which you can attach the X60-T to your backpack or clothes and free your hands. At the same time, the flashlight is surprisingly durable - its resistance is enhanced, among other things, by a cap made of aluminum alloy.
