Hobbywing XERUN XR8-Plus Regulator

The XR8 PLUS regulator provides an exceptionally smooth ride. Thanks to the coasting throttle function, controlling our vehicle feels like driving a large car. Due to the unique design and innovative technologies used in the XR8 PLUS regulator, it requires virtually no maintenance! Durable construction and advanced heat distribution system allows it to be used in virtually any conditions!

Built-in BEC

XR8 PLUS is the world's first regulator for 1/8 scale which has HV integration and built-in BEC with current capacity up to 15A. It supports modern high voltage servos without any problems.

Manufacturer

Hobbywing

Model

□HW30113300

□Scale

□1:8

□Continuous / instantaneous current

□150A / 950A

□Power supply

□2-6S LiPo/6-18 Cel NiMH

□BEC output

□Mode switch: 6V/7.4V,6A

□Input cables□

□Red- 10AWG-200mm/Red- 10AWG-150mm/Black - 10AWG-150mm

□Output cables

□Black- 12AWG-200mm *3

□Input connector□

□None

□Output connector□

□None

□Set button in ESC

□Inactive

□Led Program Box□

□Inactive

□LCD Program box

□Active

□Wifi module

□Active

□Programming port

□FAN / Program port
