

PGYTECH DJI Mavic 3 Pro UV Filter (Professional)

Ref: 6976100482272

PGYTECH DJI Mavic 3 Pro UV Filter (Professional)

PGYTECH DJI Mavic 3 Pro UV Filter (Professional)

Try PGYTECH's UV filter, which blocks blue light and delivers fantastic results. It's created with premium Japanese AGC glass and aircraft-grade aluminum, making it lightweight yet durable. Special protective coatings protect it from dirt and damage, and installation won't be a problem.

Impressive image quality

Creating stunning bird's-eye photographs may be easier than you think. Made of AGC glass that has been ground and polished many times, the UV filter prevents UV rays from entering the lens. It also blocks blue light, so you can easily eliminate unwanted blue or whitish tones from your photos. Thus, the product will be great, for example, when photographing open spaces such as seas or vast fields. The filter will also allow you to avoid unwanted glare, while maintaining vivid, natural colors.

Forget about cleaning problems

The product is surprisingly durable and easy to maintain. It has been coated with a 2-sided multilayer coating that repels water and grease, so you can easily keep it clean. The filter is also scratch-resistant. So it will serve you perfectly for a long time.

Made for DJI Mavic 3 Pro

Are you worried that the accessory will overload the drone and affect the quality of flight? Don't be! The filter weighs just 3.3 grams. The frame is made of CNC aerospace aluminum, which makes it incredibly lightweight, yet durable. It is also distinguished by its resistance to corrosion. At the same time, the product is perfectly matched to the DJI Mavic 3 Pro. It will not disturb its balance and will allow you to enjoy a smooth, exciting flight.
