

Set of 2 filters GND Freewell for DJI Mavic 3 Pro

Ref: 6972971862199

Set of 2 filters GND Freewell for DJI Mavic 3 Pro

Set of 2 GND Freewell filters for DJI Mavic 3 Pro / DJI Mavic 3 Pro Cine

The set of 2 GND Freewell filters is ideal for DJI Mavic 3 Pro and DJI Mavic 3 Pro Cine drone owners who want to get better quality photos and videos in varying lighting conditions. The kit comes with two GND (Graduated Neutral Density) filters - a GND0.9 filter and a GND1.2 filter, which allow you to adjust the exposure depending on the light level on different parts of the frame. The kit also includes a special case to safely store the filters and protect them from mechanical damage.

Perfect shots in different conditions

The GND0.9 filter reduces the amount of light coming into the mid-frame, allowing for more balanced exposures when the sky is bright and the ground is dark. The GND1.2 filter, on the other hand, reduces the amount of light entering two-thirds of the frame, which is ideal for shooting in extreme lighting conditions when the difference in brightness between the sky and the ground is very large.

High quality workmanship

The filters are made of high-quality German optical glass, which is incredibly resistant to scratches, dust or oil stains. So you can be sure that you will keep them in great condition for a long time! Their installation will not pose any problem for you. You also don't have to worry about them interfering with your drone's operation! The kit also comes with a case, which allows you to store the filters safely and keeps them protected from damage.

Included
GND0.9 filter
GND1.2 filter
Manufacturer
Freewell
Model
FW-M3P-GND
Compatibility
DJI Mavic 3 Pro / DJI Mavic 3 Pro Cine
