HW30401910 XERUN 4268 SD, 2400Kv OnRoad - G3 - black

The XERUN 4268 SD G3 is an innovative inverter motor for 1/8 scale Buggy and Truggy remote control models. Designed to work with XERUN XR8 series controllers, it offers an instantaneous speed increase of up to 50% thanks to its unique Turbo Timing function, which allows mechanical adjustment from 20-40 degrees in both directions. The use of innovative HALL technology ensures stability and flawless operation. The motor is distinguished by its IP5X protection rating, enabling trouble-free operation in demanding field conditions. Powered from 2 to 6S, the XERUN 4268 SD G3 promises dynamics, power and unprecedented reliability for RC enthusiasts.

Manufacturer

Hobbywing

Model

HW30401910

Application

1/8 Buggy and Truggy

Power supply

2-6S

Degree of protection

IPX5
