

Freewell ND2000 Neutral Density Filter for DJI Mav

Freewell ND2000 Neutral Density Filter for DJI Mav

Ref: 6972971862069

Freewell ND2000 filter for DJI Mavic 3 Pro

Freewell's ND2000 filter helps reduce the amount of light reaching the camera's sensor, allowing you to preserve original colors and details. It's designed to provide exceptional performance when shooting long exposures, opening the door to creative experimentation. Whether you're a professional photographer or an enthusiast, the ND2000 filter will help you achieve great results. What's more, it's made of German optical glass, making it resistant to water, oil and dust.

Effective performance

Freewell's ND2000 filter provides effective glare reduction, so you can easily take shots that feature realistic colors and excellent contrast. The product also helps you control your camera's exposure settings when taking photos or recording outdoors.

Thoughtful design

The design of the ND2000 filter has been refined to the smallest detail. German optical glass was used in its production. The product is scratch-resistant, and thanks to a special coating, it is waterproof, dustproof and oil-resistant. In addition, thanks to the Gimbal Safe technology developed by Freewell, you can be sure that the product will not have a negative impact on the performance of your drone.
