TWS QCY T15 Crosssky GTR Headphones (white)

QCY's wireless headphones guarantee great sound and unmatched comfort in any situation! The T15 model features an ergonomic, open shape with adjustability, offers directional audio with virtual bass algorithm and is equipped with noise-canceling microphones. The headphones can work around the clock, and are IPX5 rated. The Crosssky GTR are a winner of the 2022 Muse Design Awards. They work with iOS and Android, providing broad compatibility with most mobile devices.

### Perfect fit

A distinctive feature of the headphones is their open design with the possibility of rotation. This design allows you to choose the perfect angle of the headphones in relation to your ear, so you can enjoy long-lasting comfort. Unlike in-ear headphones, the T15s lay in the auricle, not in the ear canal, so the feeling of uncomfortable pressure has been eliminated.

### Directional audio

QCY engineers have taken care of the precise transmission of sound directly to your ears. The headphones' design means you can freely listen to music at the train station, for example, without worrying about missing an important message. If you are worried that the songs you are listening to will be heard by others, nothing could be further from the truth! You are alone with them! (Note: above the volume level of 80%, people sitting close to you may hear some sounds).

#### More bass

The headphones use a specially developed algorithm based on the characteristics of human hearing. This makes the sound of low tones even more pronounced, allowing you to even feel the stirring bass in your favorite songs.

#### Spatial sound full of detail

The T15 features specially designed biomembrane drivers. The large vibration surface provides even greater sensitivity, resulting in accurate, spatial sound transmission, full of clear vocals and sonic details. Rediscover the songs you love!

#### Free phone calls

This model will allow you to make clear online broadcasts or casual phone calls. Equipped with quadruple noise-canceling microphones, it will make sure your recipients hear every word you say!

#### In tune with your rhythm

The T15 headphones are great for everyday use. Their design allows for comfortable use in any situation, so they will successfully serve you not only when you are talking on the phone or listening to music on the go, but will also accompany you even in the toughest workouts! What's more, you don't have to give up listening to music when you get caught in a downpour on the way home. T15's waterproof rating is IPX5, so they are not afraid of sweat or raindrops!

#### Capacious battery

A whole day of listening to music? With QCY it's possible! The headphones support Bluetooth 5.3 and have a range of up to 10 meters. Fully charged, they guarantee 6 hours of listening, and with a charging case, you'll extend that time to 24 hours! In the set you will find a USB to USB-C cable, with the help of which you can easily replenish the energy of your case.

#### Convenient operation

T15s are a multi-dimensional comfort - they are not only extremely comfortable to wear, but also to use. Touch panels allow you to answer/end calls, stop, resume and switch songs, or change modes. What's more, in the QCY app you can customize the operation of the panels, as well as adjust the EQ values.
