

## Car Charger Mcdodo CC-2310, 2xUSB-C + USB-A, with Display, 1

Car Charger Mcdodo CC-2310, 2xUSB-C + USB-A, with Display, 100W

Ref: 6921002623100

Mcdodo CC-2310 car charger, 2xUSB-C USB-A, with display, 100W

Looking for a proven car charger? Mcdodo CC-2310 will be the perfect choice! It is equipped with 3 ports, so you can easily charge several devices at once and save time! What's more, it's compatible with multiple fast charging protocols, so your gear can be ready to use again in no time. In addition, thanks to its wide input voltage range, it will fit many vehicles.

### Fast charging

The Mcdodo car charger is equipped with 3 charging ports - including 2 USB-C ports and 1 USB-A port - so you can charge several devices at once, saving time. What's more, the USB-C1 input exhibits a fast charging rate of 100 watts, allowing your Mcbook Pro 13" to recover as much as 73% in just one hour! In addition, it is compatible with multiple fast charging protocols including PD, PPS, QC4.0 or SCP, so your phones can be ready for use again in no time, too!

### Reliable performance and great compatibility

You can easily apply the Mcdodo charger to most 12-24V vehicles - from cars to trucks. What's more, it also shows wide compatibility with laptops, tablets, phones or game consoles like Switch. Its performance will be reliable thanks to the gold-plated connector, which improves the sensitivity of the connection, and the extended, non-slip components will ensure exceptional stability. From today you can charge your equipment with peace of mind even on bumpy roads.

### Thoughtful design

What sets Mcdodo apart is its thoughtful and carefully designed design. It guarantees safer charging as it shows the output voltage in real time. What's more, the blue backlight that turns on when the charger is inserted into the cigarette lighter socket will make it easy to locate. With Mcdodo, you'll charge your gear quickly and easily!

### Full protection

Mcdodo is not only a very convenient device, it is also fully secure. This charger is equipped with a number of protections including surge protection, short circuit protection, overcurrent protection or overheating protection, and that's not all! This gives you the assurance that your charger is fully safe.
