Monitor Koorui P01 23.8" 1920x1080px 100Hz

Meet the Koorui P01 gaming monitor! Designed for gamers who do not accept compromises! Its 23.8-inch FHD screen provides clarity, and with a VA technology panel, offers a picture of fantastic quality. In the game, every pixel counts! With a 178° viewing angle, you'll clearly see everything on the screen, no matter from where you're viewing it. The monitor offers HDMI, VGA and DC inputs, providing wide compatibility and versatility of use with your devices. Computer, console, camera, or laptop? There are no limits with Koorui!

Deep blacks and amazing contrasts

The use of a VA panel guarantees deep blacks and exceptional contrast, so you'll experience even deeper immersion during your favorite entertainment. With a contrast ratio of 3,000:1, the Koorui P01 reproduces details in the dark and light parts of the image with unparalleled precision, allowing gamers to see details they might miss on other screens.

Image smoothness at the highest level

The 100 Hz refresh rate guarantees smoothness of every movement, eliminating afterimages and image breaks, which is essential during intense gameplay. You'll never miss your opponent's too-fast punch again - Koorui P01 is your partner for victory!

Colors that bring any scene to life

99% coverage of the sRGB gamut and 72% NTSC - what does that mean? Every color displayed on the P01 monitor is vivid, realistic and full of depth. If you value high-level gameplay, you'll appreciate the color accuracy that will make the gaming world absorb you completely.

Customize to your gaming style

That's not all the advantages of the P01 monitor - user comfort is the key to your satisfaction. Tilt adjustment and VESA support allow you to customize the monitor, whether you want to place it on a desk or hang it on a wall. Use as you like and enjoy the freedom of Koorui.

Advanced features for the discerning

Koorui P01 offers many smart features that make using the monitor even more convenient. MPRT OD (with 3 refresh rates, ideal for different game genres) and dedicated RTS and FPS modes ensure that the image is optimized according to the player's preferences. What's more, the P01 offers a blue light filter to protect your eyesight, so your eyes won't get tired with prolonged use.
