

## Sonic toothbrush + Water flosser Soocas Neos (white)

Ref: 6970237665249

Sonic toothbrush + Water flosser Soocas Neos (white)

Sonic toothbrush irrigator 2-in-1 Soocas Neos (white)

Let your smile speak for itself! With the Soocas sonic toothbrush and 2-in-1 irrigator, you'll not only gain healthier teeth, but also confidence. What sets the Neos model apart from others? It is the first in the world to combine traditional brushing with flossing. As a result, you will achieve much greater efficiency. The device removes as much as 40 times more plaque than a regular manual toothbrush, and on top of that, it cleans interdental spaces 10 times more effectively. You will also whiten your teeth with its help. The design is engineered to combine the flow of water with the movement of the bristles for even better cleaning results. The vibration frequency is as high as 30,000 rpm. In addition, you can choose from 3 levels of intensity and 2 modes to customize the cleaning according to your needs. A single charge allows you to use the device for up to 30 days.

Comprehensive care

The Neos toothbrush introduces a true revolution in oral care, using a range of practical technologies. The pump is the key element that puts water under pressure, creating a pulsating stream that precisely reaches where traditional methods are difficult to reach. The device combines two types of motors, generating a high vibration frequency of up to 30,000 rpm, and allowing water to flow freely for flossing. From now on, you will effectively clean the surface of teeth, interdental spaces and gum lines.

Toothbrush and irrigator in one

The pulsed flossing method is a key part of the Neos model's performance. The device generates powerful pulses that allow efficient removal of food debris, surpassing the effectiveness of traditional flossing methods. The method used is less irritating to the gums and allows the device to thoroughly reach hard-to-reach areas. In addition, the pulsating water flow allows as much as 40 seconds of flossing with minimal water consumption. If you're looking for a comprehensive solution to help you take care of your oral health, the Soocas 2-in-1 sonic toothbrush and irrigator is the answer. It's a modern approach to oral care that will deliver visible results and enhance the quality of your daily ritual.

#### Several intensity levels and 2 modes of operation

Experience a comprehensive process that combines brushing and flossing. Simply press the Deep Clean button to remove food debris from the surface of your teeth. The device will then vibrate for 3 seconds before flossing mode is activated. You can adjust the brushing efficiency while keeping the flossing intensity constant. Neos offers up to 3 intensity levels: Gentle, Standard and Strong. In addition, you can choose from 2 modes - Rapid Shine Cleaning Solution is an effective combination of short but intense brushing along with flossing, which lasts from 30 to 50 seconds. The Ultimate Deep Cleaning Solution, on the other hand, offers up to 75 seconds of brushing followed by 30 to 50 seconds of brushing along with flossing, delivering advanced oral care. Customize the action of the device to your needs and feel the difference after the first use!

#### Attention to every detail

When designing the Soocas device, every detail was focused on to ensure the best possible performance. The water outlet has been precisely positioned on the brush head, ensuring a smooth flow without disturbing the movement of the bristles. The solution used allows for comprehensive cleaning. The upper and lower bristles of the toothbrush are dedicated to the interdental spaces. The bristles in the middle part of the head are perfect for cleaning the surface of the teeth and gum line. On the other hand, the bristles on the sides are designed for gum care. In addition, all of the bristles change color after a certain amount of use, so you'll always know when to replace them. Its tips are 80% rounded for gentleness, and the W-shaped arrangement fits perfectly against the teeth, facilitating effective cleaning.

#### Thoughtful solutions

Care has been taken to make using the Soocas as convenient as possible for you. The toothbrush remembers the last mode you used and sets it as the default, and a special indicator informs you of the currently selected mode. Smart reminders inform you when you need to change the brushed area, helping you develop good oral hygiene habits. Thanks to its IPX8 waterproof rating, you can freely take care of your oral hygiene without worrying about damage. In addition, the water pressure control system maintains constant pressure, preventing damage to the gum line. The material used in the toothbrush is FDA-approved. All for the sake of your comfort!

#### Always ready to work

The powerful 2600 mAh lithium battery allows for up to 30 days of use (when you use the device 2 times a day). When the battery charge drops below 30%, the indicator lights up red, signaling that there are 5 days of use left. The included base allows for convenient renewal of energy - the time it takes to prepare the device for further use is about 8 hours.

#### In the set:

Sonic toothbrush and irrigator 2-in-1

Replacement head x3

Charging base

Waterproof storage bag

Water reservoir cleaning brush
