

Brushless ESC Hobbywing QuicRun WP 10BL60 60A

Brushless ESC Hobbywing QuicRun WP 10BL60 60A

Ref: 6938994413022

Hobbywing QuicRun WP 10BL60 60A brushless regulator

Reliable regulator combined with advanced software provides not only high power output but also ESC overload protection. The main advantages of the regulator are excellent performance and powerful torque. QUICKRUN 10BL60 will meet the expectations of all those who are looking for powerful thrills, but also competitors competing in RC modelin competitions. Thanks to the adjustable ESC, we can enjoy smooth operation of our model.

Excellent cooling system and built-in BEC

Hobbywing brand's patented cooling system provides excellent heat distribution. Made with a high-quality regulator combined with a cooling fan, it allows you to maintain full performance. The built-in BEC mode switch with maximum power and 3A/6V makes this regulator very versatile and compatible with most servos.

□Manufacturer

□Hobbywing

□Model

□HW30107100

□Scale

- 1:10
- Continuous / instantaneous current
- 60A / 360A
- Power supply
- 2-3S LiPo/6-9 Cel NiMH
- BEC output
- 6V/3A mode switch
- Input cables
- Red- 14AWG-150mm /Black- 14AWG-150mm
- Output cables
- Black- 14AWG-100mm *3
- Input connector
- None
- Output connector
- Gold Banana 4mm
- Set button in ESC
