

Foldable solar charger Choetech SC004 14W, 1xUSB (grey)

Ref: 6971824970456

Foldable solar charger Choetech SC004 14W, 1xUSB (grey)

Choetech SC004 14W Foldable Solar Charger, 1xUSB (gray).

Choetech SC004 is a portable foldable solar charger that is great for traveling. This charger is 14W and can charge devices with up to 5V (2.4A) when exposed to direct sunlight. It automatically adjusts the voltage to the connected device. Thanks to its versatility, the charger will work well for phones, tablets, powerbanks, etc. In turn, thanks to its waterproof surface, you can count on its resistance to splashes. In addition, on the outside it has a pocket secured by a strap, a metal clip and two holes on the edge of the case, which allow you to hang the charger or tie it to a surface of your choice.

Handiness

The charger's biggest advantage is its compact size - it measures 660 x 148mm when unfolded and only 153 x 148mm when folded. It will therefore be great for backpack-only trips, when every bit of space and every bit of power is at a premium.
