Smartwatch Mibro Watch C3

Looking for a versatile smartwatch that will come in handy at home, at work, for workouts and more? Mibro Watch C3 will be a real hit! It will not only notify you of incoming messages, but also allow you to make Bluetooth phone calls. It offers up to 70 sports modes to choose from and can monitor heart rate, sleep and blood oxygen saturation. It is also distinguished by a battery life of up to 10 days and a large 1.85-inch HD screen. Note: the product can only be activated in Greece.

1.85-inch display

Enjoy a comfortable smartwatch experience. The Mibro Watch C3 is equipped with a 1.85-inch HD display, which features a refresh rate of up to 60 Hz and provides high-quality image in almost any conditions. You can also customize the appearance of the screen to your liking - just use the Mibro Fit app. Among other things, you'll find original dynamic dial designs!

Stay up to date

With Mibro Watch C3 you don't have to worry about missing something important. The smartwatch will instantly notify you of incoming messages and calls. With its help you can also make phone calls conveniently! Such a solution will be great, for example, at work or

during training. The device also allows you to reject a call or send an SMS to the caller with one click.

Exceptional performance

Forget about stuttering and delays. The smartwatch's low power consumption and dual-core architecture have increased the performance of the smartwatch's processor by up to 80%. In addition, the new Bluetooth 2-in-1 chip guarantees a faster and more stable connection, and the 2.5D GPU allows dynamic dial patterns to run smoothly.

Refined in every detail

With its metal frame and sleek, minimalist design, the Mibro Watch C3 can perfectly complement any style. You'll also find 2 types of straps - silicone and woven. Choose the one that best meets your expectations! An additional advantage of the device is water resistance (2ATM) - you don't have to take it off your wrist when you work out, wash dishes or it rains. Drops of water or accidental splashing are no threat to it!

For the sake of health

The smartwatch is equipped with a new and improved 4PD heart rate sensor, which supports biometric identification technology and provides more accurate measurements. This allows the device to accurately monitor heart rate for up to 24 hours a day! There is also a function for monitoring sleep and blood oxygen saturation. Improve the quality of your rest, find out about any abnormalities immediately and react quickly to alarming symptoms! In addition, Mibro Watch C3 can track your menstrual cycle.

Plenty of useful features

With the Mibro Watch C3, everything you might need is at your fingertips. Among other things, the smartwatch lets you check the weather and set an alarm clock. It also monitors stress and offers relaxing breathing exercises. It also provides access to a calendar, and if you sit in one place for too long, it will remind you to move. A stopwatch and timer function is also available. The watch also allows you to play music and take photos remotely using the camera of a smartphone paired with it.

As many as 70 sports modes

Choose from up to 70 sports modes, track your progress and set your next goals to achieve. Swimming, skipping, soccer, or maybe yoga? You are sure to find something for you! But that's not the end of the possibilities - when you use running, cycling, walking, mountain climbing or rollerblading mode, and the smartwatch is paired with a smartphone, your workout routes will be generated in the app (using your phone's GPS). You can also share your exercise information with friends!

Up to 10 days of operation

Don't be afraid of having to charge your smartwatch frequently - the Mibro Watch C3 won't discharge too quickly. With normal daily use, you can use it for up to 10 days. In basic mode (when the watch is on, but not worn or connected to the app) it lasts up to 50 days! Music playback time is about 5.5 hours, and Bluetooth talk time is about 5 hours.
