

## Landing pad for drones Sunnyslife 80cm hexagon - Double Sided

Ref: 5905316147485

Landing pad for drones Sunnyslife 80cm hexagon - Double Sided (TJP11)

Mat/ Sunnyslife drone landing pad 80 cm hexagon, double-sided and waterproof (TJP11)

Provide your drone with a safe landing. The Sunnyslife double-sided landing pad is made of PU leather and silicone - as a result, it is durable, as well as water and wind resistant. It will work well with drones from the Mavic, Mavic Air, Phantom, Autel EVO or Mini series. The included carrying case makes it easy to store.

### Durable design

Four pegs guarantee reliable stabilization and keep the mat in its designated place. This means you don't have to worry about wind, which can occur in open spaces, on the beach or grassy areas. The hexagonal design of the landing mat is perfectly distinguished by its high resistance.

### Convenience of use

When folded, the landing pad is about the size of a tablet (26.5 x 24 cm), and when unfolded it offers 80 x 72 cm of space. The reliable waterproof PU plastic construction allows the landing pad to be cleaned and wiped down effortlessly, even during wild adventures. The product's distinctive colors won't fade, and the careful finishing of the stitching and binding is the result of solid and precise craftsmanship. In addition to the mat, the kit comes with a special case to store it in for safe transportation. In addition, you will find 4 stabilizing pins in the package.

In the set:

Landing pad x1

Case x1

Stabilizing peg x4
