

Heat gun Deko Tools DKHG05, 2000W

Heat gun Deko Tools DKHG05, 2000W

Ref: 6974491581727

Perfect Thermal Control with DKHG05 Heat Gun

The Deko Tools DKHG05 electric heat gun with a power of 2000W is an advanced tool designed to provide professionals and hobbyists with precise control over thermal processes. Thanks to meticulously selected parameters and innovative features, the DKHG05 heat gun becomes an indispensable companion for tasks involving thermoplastic materials.

A Partner in Material Work

Powered by 220-240V~50/60Hz voltage, the heat gun generates a power of 2000W, allowing for the rapid attainment of the required working temperature. The multi-stage air temperature adjustment enables precise adaptation to specific applications. Three temperature modes are available: 110°C (I), 380°C (II), and an impressive 600°C (III), providing flexibility in handling thermal materials.

Advanced System

The DKHG05 heat gun stands out with its advanced temperature control system, ensuring stability and precision in operation. This allows users to easily tailor the tool to the requirements of specific tasks and avoid undesirable effects during thermal material processing.

Model Number:

DKHG05

Rated Voltage:

220-240V~50/60Hz

Input Power:

2000W

Air Temperature:

I=110°C, II=380°C, III=600°C

Packaging:

box

Price:

Before: € 21.5004

Now: € 21.00
