

Mini Gas Leak Detector Hobotest HT61

Mini Gas Leak Detector Hobotest HT61

Ref: 5907489606738

Hobotest HT61 gas meter

The HT61 gas meter detects many types of gases, and thanks to its high-end sensor, provides precise measurement. The device is equipped with a dual alarm - visual and audible. Compact, handy and portable - will prove useful in many applications. To power the meter 2 AAA batteries are required - not included and must be purchased separately.

Reliable and precise performance

The HT61 is ready for use approximately 30 seconds after startup, and has a response time of less than 2 seconds. The built-in solid-state sensor features high precision and can detect methane with an accuracy of ± 10 F.S. The device can detect a variety of gases - including acetone, carbon monoxide, propane or benzene. Measurement results are displayed in bar graph form on an easy-to-read, backlit HD LCD screen.

2 types of alarm

The meter is equipped with a dual alarm, so you can rest assured that you will be notified of any possible danger immediately. If the device detects a gas leak, it will start beeping and the display backlight color will turn red. You can also choose high or low detection sensitivity.

Portable and functional

The device is lightweight and compact, and therefore portable. You can even fit it in your pocket. You can easily take it anywhere you need it. The pocket-sized design of the HT61 combined with its functionality makes it suitable for many different applications - for example, at home, in the factory or at the gas station.
