

## Multitool MiniSailor NexTool NE20237 (Scissors Version)

Ref: 6973907631414

Multitool MiniSailor NexTool NE20237 (Scissors Version)

Multitool MiniSailor NexTool NE20237 (with scissors)

Equip yourself with a multitool that will help you meet your daily challenges. The MiniSailor Multitool by NexTool offers up to 10 practical functions. You can use it as a scissors, knife, metal file, flat screwdriver, SIM card needle or bottle opener, among others. Despite its wide range of applications, the product is distinguished by its compact design, so you can always have it with you. It is made of high-quality materials, which translates into high durability.

Versatility in one tool

The NexTool multifunctional tool is distinguished by its great versatility. Scissors and a variety of knives allow for accurate cutting, while pliers provide reliable clamping. Additional holes make it easy to hang and store the tool, and the built-in bottle opener is great for social gatherings and outdoor activities.

The ultimate in precision

The NexTool is also perfect for tasks that require extreme precision. It features a variety of screwdrivers, including a flat, large and Phillips screwdriver. A SIM card removal needle and a metal file will also be at your disposal. MiniSailor will become an invaluable support at home, in the workshop or on the go, providing efficiency in a wide range of applications.

### Elegant design and convenience of use

The tool's delicate casing combines aesthetics and durability. Its compact size allows it to be conveniently carried in a pocket, which is important for those working in different locations. Efficient opening and closing provides convenience of use, and the matte handle guarantees a secure grip. With MiniSailor, work will not only become more efficient, but also more enjoyable.

### Attention to detail

2 combinations of precision gear patterns allow you to customize the grinding process to suit your current needs. In addition, a separate large screwdriver expands the tool's range of applications, which will be appreciated by those involved in a variety of projects. The tool is also distinguished by innovation, evident in, among other things, a practical hook for easy storage and creative use to decorate the workspace.

### High-quality materials

In designing the NexTool, top-class materials were used. The blade of the knife is made of 420J2 stainless steel, which translates into durability and sharpness. Other components are made of solid steel and aluminum alloy. The combination of these materials translates into the tool's reliability in a variety of applications, ensuring confident performance in any situation.
