

## Wireless mechanical keyboard Royal Kludge RK84 RGB, Red swit

Ref: 6935280813559

Mechanical keyboard Royal Kludge RK84 RGB, Red switch (black)

Royal Kludge RK84 RGB Mechanical Keyboard, Red switch (black).

If you're looking for reliability, precision and exceptional performance during gameplay, the Royal Kludge RK84 RGB mechanical gaming keyboard will meet your expectations. Equipped with a 3750mAh battery, it will allow you to use it for 200 hours while working or playing games. Moreover, the RK84 has 84 keys, giving you the freedom to use it according to your needs. What's more, you'll find 4 additional red line switches, which are perfect in case of emergency. On the other hand, the foam dampening will allow you to work in silence, and the rubber and magnetic pads will prevent slipping.

### Highly customizable

Your keyboard, your rules. With Royal Kludge software, you have full control over the backlighting. Choose from 14 modes or as many as 16,8\* (16,77) million RGB colors to create the right mood while you play. In addition, reprogram the keys according to your preferences, adjusting it perfectly to your playing style. What's more, you can also remove or attach the keyboard frame - use it as you're comfortable.

### Easy switch replacement

With the Royal Kludge RK837 keyboard, you can conveniently replace switches without soldering or using complicated tools. With the help of the included tweezers, you can replace the switches to make the keyboard fit your needs.

### Long working time

Equipped with a battery with an impressive 3750mAh capacity, the RK84 gaming keyboard will allow for 200 hours of use while working or playing games.

### Compatibility

Whether you're using Windows, iOS, Android or Linux, this keyboard is ready to work according to your preferences. Compatible with both desktop and mobile devices, it becomes an indispensable tool for work and entertainment. By clicking FN and the A or S key, you can switch between Windows and Mac modes.

### Wireless freedom

The Royal Kludge RK84 supports three modes of operation - wired, Bluetooth and 2.4G. This gives you full control over how you connect to different devices. You can seamlessly switch between them, remaining in full control of your gameplay. The keyboard has two USB-A inputs and one USB-C input, which allow you to plug in additional devices for charging or data transfer.

### Soundproofing and ergonomic design

The keyboard has a foam soundproofing layer, so you can work quietly, but also not lose the sense of immersion in the world presented during the game. The keyboard also features an ergonomic design - the keys are arranged in an arc so that those in the middle rows are positioned lower than the others.
