Ref: 6935280814785

Mechanical keyboard Royal Kludge RK96 RGB, Red switch (black)

Royal Kludge RK96 RGB Mechanical Keyboard, Red switch (black)

Are you looking for a proven piece of equipment that is perfect equally for work and entertainment? Royal Kludge mechanical keyboard will be the perfect choice! It will adapt to you in every way, as you can not only freely exchange switches in it, but also connect to it in different ways. What's more, its well-thought-out design will ensure uninterrupted comfort during use, and its built-in rechargeable battery will ensure long working time.

### Many possibilities

The Royal Kludge keyboard was created with many usage scenarios in mind. It is equipped with multiple ports including 2x USB and USB-C, so you can connect several devices to it simultaneously. It is compatible with phones, storage devices, mice, headphones, and that's not all! In addition, it uses red switches. They will make the use of the keyboard more pleasant and quiet. It will be perfect equally for gaming fans and those who are looking for a keyboard suitable for work.

### Thoughtful design

What sets the Royal Kludge keyboard apart is its well-thought-out design. It was created with durable materials, thanks to which I show great durability and resistance. What's more, its multilayer structure allows it to reduce noise, so it will work quietly and not disturb other people in the room. What's more, it allows you to change switches freely. You will find a magnetic pad included, which will allow you to

support your wrists comfortably.

#### Tailored to your needs

The Royal Kludge keyboard will adapt to your needs. In the dedicated PC application you can change its settings according to your expectations. Among other things, you will be able to change the use of the keys or choose the backlighting you are interested in. This will personalize the keyboard and make your work even more comfortable!

#### Multiple connectivity options

Royal Kludge responds to the needs of users and gives you the opportunity to connect to the keyboard in as many as 3 different ways! If you are a fan of traditional solutions - choose a wired connection, using a cable. However, if you want to get rid of tangled wires, connect to selected devices using a 2.4 GHz network or Bluetooth (in which you can connect to as many as 3 devices simultaneously). Moreover, you can conveniently switch between connected devices, thanks to a special switch, located on the keyboard.

#### Long working time

Worried that the keyboard will lose power at the least opportune moment? With Royal Kludge, you can abandon those fears! It is equipped with a 3750 mAh battery, so it can work for up to 250 hours (when the backlight is off). But don't worry when its energy runs out, as you can recharge it in just about 6-7 hours.

#### RGB backlighting

Give your work more colors! The Royal Kludge keyboard is equipped with RGB backlighting, which includes as many as 16.80 million colors. What's more, there are also 14 different modes at your disposal. Customize the colors for your current mood or gameplay and give your keyboard a unique look!
