Cable Mcdodo CA-1921 USB to USB-C 6A, 1.2m (pink)

Ref: 6921002619219

Cable Mcdodo CA-1921 USB to USB-C 6A, 1.2m (pink)

Mcdodo CA-1921 USB to USB-C 6A, 1.2m (pink) cable.

 The Mcdodo CA-1921 cable supports fast chargers up to 66W, so it will only take about half an hour to charge your Oppo Reno4 SE phone! The charger adjusts the charging power to your device, so you don't have to worry about it. What's more, the cable has been covered with a silicone coating along its entire length, making it durable and easy to clean. The USB-A and USB-C plugs have been fused to the cable, so there's no worry about accidentally tearing the cable at this sensitive section. The Mcdodo CA-1921 has an electronic display that shows at what voltage the device is being charged.

Elegant minimalist finish

Thanks to the silicone coating, the cable can look like new for a long time - just take a damp cloth and wipe it. This material is not only easy to clean, but perfectly protects the copper core from damage. What's more, both prongs of the cable are permanently fused to it, so the connection between them will not come loose. In addition, the silicone finish makes the cable pleasant to the touch.

Data transfer and charging

Mcdodo CA-1921 allows simultaneous charging and data transfer, so you can save a lot of time and conveniently transfer files to your computer while your phone is charging at the same time. The data transfer speed is 480Mbps.
