

Socket tester with digital display Habotest HT106D

Socket tester with digital display Habotest HT106D

Ref: 5907489606639

Habotest HT106D socket tester

The HT106D socket tester is a small but very useful device that will allow you to take better care of the safety in your home. It is equipped with an LED indicator that will provide you with the most important information. Among other things, it will notify you of the lack of grounding, and it also allows you to perform an RCD test. With the HT106D, you can avoid damage to your appliances and prevent other hazards.

You will quickly find out about possible faults

The LED indicator on the top of the device will let you know if there are any problems. If the tester detects any abnormality, the LEDs will light up in a specific combination. This will allow you to quickly find out, for example, if the plus/minus cables are swapped, if there is no grounding or if the minus cable is missing. With the HT106D you can also perform a simple RCD test.

Precise voltage measurement

The device also has a voltage measurement function, the results of which are displayed on an easy-to-read LCD screen. HT106D is characterized by high precision. With this practical device, you will gain convenient access to the most important information.

□ Producer

- Habotest
- Model
- HT106D
- Voltage range
- AC 48-250 V
- RCD testing
- >30 mA
- Voltage measurement
- Yes, 48-250 V/45-65 Hz
- LCD display
- Yes
- Backlighting
- Yes
- Safety
- EN61010-1,-2-030; EN61326-1,CAT II 300V
- Weight
- Approx. 50 g
- Dimensions
- 65x62x58 mm
