

Filter PolarPro FiftyFifty for Hero 9 / Hero 10 Black

Filter PolarPro FiftyFifty for Hero 9 / Hero 10 Black

Ref: 817465026564

PolarPro FiftyFifty filter for GoPro Hero 9/10 Black

Create amazing shots above and below the water with your GoPro Hero camera with the redesigned and improved FiftyFifty filter by PolarPro. The improved lens is easily detachable, and you'll enjoy perfect image quality thanks to the highest quality optics. When diving in shallow areas, the filter provides up to 30% wider field of view. Waterproof to a depth of 10m - for an unforgettable experience.

Convenient mounting and removal

Forget about having to take out tools every time you want to detach the lens, such as for replacement or cleaning. PolarPro FiftyFifty provides quick and easy disassembly. Never miss an opportunity to take a great shot again!

Superior image quality

The FiftyFifty offers quality that will delight you. This is made possible by the high-end optics designed specifically for PolarPro. Images taken with the filter will surprise you with amazing sharpness. Your shots can be cleaner and clearer than ever before.

Create stunning underwater shots

The FiftyFifty is not only suitable for taking original shots above the water, but also while diving, for example. A special sealing system guarantees a water resistance of up to 10m. So you can freely record the beautiful underwater world.

Extra protection

You will also find special protection for the filter in the package - DefenderH2O. You no longer have to worry about damaging the product between shots. This practical accessory provides reliable protection for the filter and allows you to enjoy the peace of mind.
