Photo studio Puluz LED 30cm PU5032G

Ref: 5907489605199

Photo studio Puluz LED 30cm PU5032G

Puluz Photo studio LED 30cm PU5032G

Puluz PU5032G shadowless tent is an ideal tool for photographers, craftsmen or sellers. Equipped with LED lighting - it will allow you to take professional photos of small objects. The product is easy to assemble, and when folded, it is handy and compact. Its portability is facilitated by special handles. High CRI Ra95 will make the photographed objects look beautiful and natural, so you can successfully auction them, brag about them on social media or sell them in your online store.

Ideal background for small objects

The dimensions of the tent are 30x30x30 cm, which means it's perfect for taking photos of small objects. Do you create handmade jewelry? Or do you sell toys, gadgets or accessories? You can successfully photograph these and many other things using the Puluz shadowless tent. In the set you will find interchangeable backgrounds in as many as 6 colors - white, black, yellow, red, blue and green. So you can easily choose one that will best emphasize the character of the subjects you are photographing.

Adjustable LED lighting

The product is equipped with an LED lamp consisting of 112 light beads. It will provide optimal illumination of the photographed objects. It is characterized by a high color rendering index. Thanks to this, things viewed in the light it generates look almost the same as in the glare of the sun, which ensures their natural appearance in photos. With the Puluz PU5032G, you also get the ability to adjust the

brightness of the lighting in 10 steps to make the photographed objects look their best.

Perfectly thought-out design
The tent is very easy to unfold and fold. Powered by a 2-meter USB cable, it gives you the freedom of your dreams - you can connect it to a charger, powerbank or even a laptop. The clever design of the product allows you to take photos from different perspectives - including from above, through a special opening. The interior of the tent is made of a special material that allows even distribution of LED light, providing optimal illumination of the photographed objects.
