

Speakers SVEN PS-550, 36W Bluetooth (black)

Speakers SVEN PS-550, 36W Bluetooth (black)

Ref: 6438162018153

SVEN PS-550 Speakers, 36W Bluetooth (black).

SVEN PS-550 is a fantastic speaker for your party - it has built-in LED lights that will bring your party to life with a fever of RGB colors that you can configure as you like! Want to organize a cool attraction for your guests? You can connect a microphone to the PS-550 speaker, and you can adjust the sound on the control panel - let your guests' talent shine! The speaker also has a built-in equalizer so you can set the perfect sound. You can play songs from multiple sources - via cable, from a flash drive, microSD card or from your phone thanks to the Bluetooth function. What's more, thanks to the TWS function, you can connect wirelessly to two speakers at the same time, which will give you an even more spacious sound.

An interactive light show at your event

Visible even during the day, and stunning at night, the backlighting in the PS-550 speakers will take care of the great atmosphere! Choose from several modes to liven up your party with a variety of impressions.

Party with karaoke

Plug a microphone into the speaker and let your guests discover your musical talent! On the control panel, you can select the sound level or set the echo to make your voice clearer and richer. Sing your favorite songs together with your family and friends! The included wide, sturdy lightweight strap will allow you to comfortably carry the devices from place to place on your shoulder.

Bluetooth wireless transmission

With Bluetooth technology, you can quickly and conveniently connect together with your speaker - even from 10 meters away! Turn on a podcast, listen to an audiobook or relax to your favorite tune together with the PS-550! Powerful sound with bass and clear high frequencies is created by two high and low frequency drivers, which you can adjust with the equalizer. Enjoy the music your way.

Play the way you want

The SVEN PS-550 gives you a wide range of options - play music via cable, from a pendrive, from a microUSB card or wirelessly via a stable Bluetooth connection. You can also turn on the radio and play to the beat of your favorite station! The cable plugged into the AUX port acts as an antenna. The LCD screen built into the control panel will tell you the frequency of the station, the volume level, the length of the track being played, but also allow you to find it by number, select the light mode or set a host of other functions.
