Sven KB-E5800 Keyboard (black)

SVEN KB-E5800 keyboard is an exceptional choice for those who want to combine modern design with comfort and functionality. Thanks to the practical layout of the keys and the durable design, work and entertainment on the computer become even more enjoyable and effective.

Thoughtful design

The layout of the keys and the variable angle of inclination allow a more natural and ergonomic hand position when typing. Thanks to this solution, operating the keyboard becomes more intuitive and enjoyable, and you can work or create without excessive fatigue.

Comfortable operation

The keyboard is equipped with 105 full-size keys, 12 of which have been dedicated to multimedia functions, accessible via the Fn key combination. Multifunctionality is a key feature of this model, allowing quick access to various options and tools.

Solid construction

The keyboard's high build quality results in a key life of 20,000,000 clicks, which translates into long-lasting and trouble-free operation. The manufacturer also used the so-called "Waterproof" technology, which protects the keyboard's microcircuitry from liquid penetration.

Special holes in the base help drain it, making the keyboard more resistant to moisture. You don't have to worry about accidental minor spills - the keyboard is ready for the challenges of everyday use.

Compatibility and safety

The USB cable's length of 1.5 meters provides flexibility and freedom to connect to the device of your choice. The keyboard also provides compatibility with the Windows operating system and Russian, Ukrainian and English keyboard layouts, making the SVEN KB-E5800 adaptable to your needs and preferences. The product is EAC certified, so you can be sure that it meets all the necessary technical requirements.
