Sven KB-S305 Keyboard (black)

Introducing a keyboard that combines high quality workmanship, user comfort and affordability - SVEN KB-S305. This wired keyboard is the perfect combination of elegance and functionality, designed for efficient operation in a variety of environments. It's the perfect choice for those looking for a balance of performance, convenience and durability in one device.

With comfort in mind

The keyboard features 105 low-profile keys that are great for both office and home use, providing smooth and quiet typing. With 12 multimedia buttons accessible via the Fn function, you have quick access to your favorite functions and multimedia. Built-in supports let you adjust the angle of the keyboard to keep your wrists comfortable. Use as you like and enjoy efficient and comfortable work.

Thoughtful and robust design

The SVEN KB-S305 keyboard is not only impressive in appearance, but also in durability. The manufacturer also used the so-called "Waterproof" technology, which protects the keyboard microcircuitry from the ingress of liquids. Special holes in the base help drain it, which increases the keyboard's resistance to moisture. You don't have to worry about accidental minor spills - the keyboard is ready for the challenges of everyday use.

Versatile and compatible

Compatibility with the Windows operating system and Russian, Ukrainian and English keyboard layouts make the SVEN KB-S305 adapt to your preferences. The manufacturer has taken care of quality, compliance with FCC, CE and EAC standards, and a key life of 20,000,000 clicks, which translates into long-lasting use. The 1.5-meter USB cable provides flexibility and a convenient connection to your computer.
