

LED Blackhead Remover Pore Vacuum Liberex

LED Blackhead Remover Pore Vacuum Liberex

Ref: 6931446930498

Liberex brand mustache remover

Do you dream of getting rid of imperfections on your skin? Are you tired of blackheads or acne? Try the Liberex brand universal blackhead remover. With 5 available levels of cleansing intensity, you can adjust it to your needs, and the blue or red light therapy will help you take even better care of your complexion. In the set you will find 4 interchangeable tips, which will prove useful in many applications. The device is also equipped with a clear LED screen which makes it easy to use.

Choose the optimal power level for your skin

Adjust the intensity of cleansing to your skin type and requirements. The 5-step adjustment gives you a range of options. If you have delicate, sensitive skin, choose the power of 20-40%. It allows you to get rid of dead skin and acne on the face. The 60-80% intensity is suitable for all skin types. It will cleanse it perfectly and eliminate any blemishes. In the case of oily skin, 99% intensity will be perfect, which will remove even the most troublesome blackheads.

Get effective light therapy

Discover the benefits of light therapy. Blue rays will help you fight acne and make your skin firmer. Red light increases collagen production and stimulates circulation. You can also use it to give yourself a relaxing, regenerating facial massage.

4 tips for multiple uses

The set comes with 4 tips that you will use in different ways. The tip with the microcrystalline diamond head can effectively fight acne scars and dead skin. The medium handpiece can be used all over the body, while the oval handpiece can be used around the nostrils, eyes and mouth, and you'll also find a separate light therapy handpiece in the pack.

User-friendly

Using the device is fabulously easy. Using the + and - buttons, you can conveniently adjust the intensity of the cleansing or select the light therapy mode. The built-in LED screen is easy to read and facilitates the work with the vacuum cleaner. It displays information about the current power. The device is also easy to clean and thanks to the USB charging you can easily connect it to a charger, powerbank or even your laptop.

Easy and enjoyable treatments

Fear that cleansing your face with a Liberex brand mustache vacuum will prove complicated? Don't be! All you need to do is wash your face with warm water before the procedure, then wipe it with a heated towel to open the pores. Later, choose the right tip and intensity. To cleanse your skin effectively and safely, slowly glide the nozzle over your skin and do not hold it in one place for more than 30 seconds. After you are done, wash your face with cold water and apply a mask to tighten your pores.
