Smartwatch Sport W8 Pro XO (Black)

The XO W8 Pro Smartwatch is a sports watch that will help you monitor your health and keep up to date with notifications and messages without the need to check your phone. It has a range of useful features that will simplify your daily life. The large 2.01-inch screen with a resolution of 240 x 296 IPS ensures that even small details will be readable. The battery life lasts between 5 and 7 days, and it only takes 2 hours to charge, so you can continuously receive information about your health. The device is made of zinc alloy and tempered glass, which guarantees its durability, as does the IP67 standard, which ensures dustproof and water resistance.

Health Monitoring

With the XO-W8 Pro smartwatch, you can monitor your blood pressure, the number of steps taken, as well as check your blood oxygen level, monitor your sleep, set an alarm, use a stopwatch, phone location, use a calculator, compass, barometer, and also use NFC, talk via Bluetooth, receive water-drinking notifications, and use a voice assistant.

Dust and Water Resistance

The IP67 standard means full dustproofing of the device, making XO-W8 PRO unfazed by off-road biking. In addition, splashes, rain, or submersion up to 1 meter deep for 30 minutes should not harm the watch, so you can take it in the shower. The construction from high-quality zinc alloy and tempered glass ensures durability and an elegant appearance.

Long Battery Life

The watch provides uninterrupted operation for a period of 5 to 7 days, allowing for health monitoring and results for almost a week. In standby mode, with the screen off, the watch can last up to 30 days. Charging the 230mAh battery takes only two hours.

Personalization

The XO W8 PRO smartwatch gives you the ability to customize its appearance to your taste, making daily use even more enjoyable.

Voice Assistant

The AI-based voice assistant is another fantastic feature of the smartwatch, allowing you to issue voice commands to check the weather, set reminders, or send a message. This keeps you up to date when your hands are busy or your phone is out of reach.

Messengers

The XO W8 PRO smartwatch allows you to stay up to date with messages and notifications from apps like WhatsApp, Facebook, Twitter, QQ, and WeChat without the need to reach for your phone. This is a great solution when you are working out or taking care of a child.

Specifications
