HOTO QWLS007 Electric Screwdriver + Bit Set (Red)

HOTO QWLS007 is an electric screwdriver with a magnetic tip, characterized by a very simple, lightweight design made of high-quality construction material and an interesting appearance. The screwdriver is fabulously simple to use - it has only two functions: screwing and unscrewing, which you can activate by pressing the only forward or backward arrow button. Thanks to the 150mAh battery, you can screw in over 200 screws. Included in the set are 2 durable S2 steel bits, 50mm in length, with PH2 Philips and H4 Hex tips, to solve all your problems.
