

Smartmi Evaporative Humidifier 3

Smartmi Evaporative Humidifier 3

Ref: 6970403203336

Smartmi Evaporative Humidifier 3

Create a healthy environment in your home. Smartmi Evaporative Humidifier 3 is a smart humidifier that uses evaporative technology. It does not produce harmful mist, so you can use it safely. In addition, it has a water tank with a capacity of 5 l, so you can reduce the frequency of refilling. What's more, you can control it with voice commands or an app, and the LED display will provide you with information about the device's operation status.

Clean, humidified air

The device sucks in dry air and then passes it through a fan submerged in water. It then returns it to the environment free of contaminants and fully humidified. The Smartmi Evaporative Humidifier 3 does not produce harmful mist and does not leave wet stains on furniture or appliances. It will therefore work well for users suffering from upper respiratory diseases, infants and the elderly. In addition, it does not generate ultrasonic sounds, which can be a nuisance to pets. You can also combine the humidifier in the Mi Home app with other smart devices, such as a fan, air purifier or convection heater for maximum comfort.

The right level of humidification

Don't worry about refilling water too often. The smart evaporative humidifier is equipped with a 5-liter tank, which is enough for about 14 h. In addition, its capacity is 350 ml/h, so you can enjoy constantly humidified air. What's more, a precise sensor accurately monitors the

level of humidification in real time and automatically adjusts the device's operation according to it.

Simple, convenient operation

Control the device from within Mi Home. The app lets you control the device remotely, so you don't even have to get up from the couch. You can easily turn on/off the device, adjust the humidification level, set the timer, enable the child lock, etc. In addition, the product is compatible with Google Assistant, Amazon Alexa and Yandex Alice voice assistants. So all you need is a simple command to customize the device's operation.

Refined in every detail

The Smartmi Evaporative Humidifier 3 has been designed with attention to detail. The device features a smart LED display that allows you to monitor the humidifier's operation in real time. From its level, you can read the current percentage of humidified air, the amount of water in the tank or the mode of operation. You can easily refill the water in the tank without removing the lid. Keeping the device clean won't be a problem either, and the transparent indicator will let you know how much water is in the tank. This way you will always refill it on time. In addition, a special safety feature automatically stops the humidifier when you remove the tank or when it runs out of water.

User-friendly

Smartmi evaporative humidifier is a money-saver and hassle-free humidification. The device effectively humidifies indoor air without replacing any consumables. All you need to do is fill it with water and clean the water tank regularly. In addition, the Evaporative Humidifier 3 offers a self-cleaning mode to serve you for as long as possible. In addition, the drying mode helps prevent the growth of bacteria.
