

Ratchet Screwdriver Set JIMI Home JM-GT101

Ratchet Screwdriver Set JIMI Home JM-GT101

Ref: 6970211470173

JIMI Home JM-GT101 hand screwdriver + 24 bit set.

Restoration, malfunction, or DIY? The Jimi Home hand screwdriver is an essential tool for any of these situations. With the JM-GT101, you can effortlessly screw in all kinds of screws. It supports 3 screwdriving/driving modes and offers 3 blade lengths, making it ideal for working in harder-to-reach places. Equipped with a strong magnet, it allows you to conveniently install and replace bits (24 types), making DIY even easier. The set also includes a wrench designed for popular nuts. All this in a minimalist, compact case that you can easily take with you wherever you need to go.

Ratcheting screwdriver

The Jimi Home screwdriver is a tool with which you can effortlessly twist furniture or carry out renovations at home. The carefully thought-out design ensures convenient operation. The ratchet allows easy and efficient screwdriving/unscrewing, which is especially useful for more work. It also supports a third mode with ratchet lock.

For special tasks

No matter what conditions you have to work in, the Jimi Home will perform well. The screwdriver is equipped with an extendable blade with adjustable length. At your disposal are 35 mm, 60 mm and 90 mm sizes. This is a useful feature that will allow you to easily reach screws with more difficult access.

Magnetic bit mounting

The screwdriver bit is distinguished by its magnetic design. This means that mounting and replacing bits is easy and convenient. Above all, however, the bits do not shift or fall out, which ensures precision while working. What's more, the case in which you'll find the bits, just like the blade, has a magnetic design, so storing the bits is safe and comfortable.

24 bits in the set

In the set you will find as many as 24 bits in different shapes and sizes. This means that with the Jimi Home set you are ready for any glitch, repair or tinkering in your workshop. Each bit has its own place in the case, so keeping it organized is hassle-free.

Sophisticated design

The JM-GT101 hand screwdriver was created from high-quality materials, such as stainless steel, ABS, and TPE, which not only ensures durability, but adds to its luxury features. The comfort of use is influenced by the carefully designed handle, thanks to which the screwdriver fits perfectly in the hand. The minimalist case is equipped with a screw storage compartment, which eliminates the problem of losing screws.

French wrench

In the case you will also find a wrench with a thoughtful design. It is designed to work with the popular nuts in every home in 4 sizes (M5, M6, M7, M8). This is a reliable tool that will come in handy in case of more than one breakdown.
