SmartWatch HiFuture FutureFit Ultra 2 (pink)

Ref: 6972576180995

HiFuture FutureFit Ultra 2 smartwatch (pink)

FutureFit Ultra 2 is a waterproof smartwatch with which you will gain momentum. It provides information to help you significantly improve your well-being and fitness. An example? FutureFit Ultra 2 measures blood oxygen saturation, sleep cycles, as well as steps and calories burned. What's more, it supports wireless phone calls, giving you even more freedom. The device will also be your assistant - you can set reminders and will receive notifications that appear on your phone. All this for 7 days on a single charge. Want the watch to reflect your personality or mood? You can choose from a whole host of colorful dials, which the 1.85-inch screen will display.

Support for daily chores

The smartwatch connects to your phone wirelessly and provides stable signal transmission. It works with OS8/Android 5.0 and above, so no matter what device you use, the FutureFit Ultra 2 will do its job. It allows wireless phone calls and lets you set reminders, so you're always on top of your tasks.

A picture full of stunning colors

The 1.85-inch IPS screen will give you an amazing experience. The large surface provides comfortable operation and perfect visibility, even in bright sunlight. FutureFit Ultra 2 offers more than a hundred color dials to personalize the look of your smartwatch. Every day you can please your eye with a different design, full of vibrant colors.

### Guardian of your health

Listen to your body. FutureFit Ultra 2 will make it easy. The smartwatch monitors and analyzes parameters such as blood oxygen saturation and sleep cycle around the clock, in order to help you improve your daily habits and improve your well-being. There's also step measurement and 24 sports modes at your disposal, so you can reach new goals and beat your own records in the fight for fitness and a healthy figure.

### Waterproof design

The HiFuture FutureFit Ultra 2 will keep up with you in any situation. With an IP68 water resistance rating, you don't have to worry about everyday splashes when washing your hands or dishes. What's more, the watch is resistant to intentional immersion in water, so you can take it for a workout at the pool, for example, without worry.

### The whole work week

The smartwatch will provide support for your daily activities throughout the week. The capacious polymer-lithium battery (300 mAh) lasts up to 7 days when you use all functions. Standby mode provides up to 25 days without the need to refill.
