

Controller Hobbywing EZRUN MAX5 V3 ESC

Controller Hobbywing EZRUN MAX5 V3 ESC

Ref: 6938994405386

Hobbywing EZRUN MAX5 V3 regulator

EZRUN MAX5 brushless regulator for 1:5 scale model cars. High power, flexibility and freedom of operation. The regulator is completely waterproof, leak-proof and efficient. It is the first in the industry to have a built-in maximum output current of 25A. High servo torque makes control even easier. The regulator's software can be updated via the Internet. The regulator is trouble-free, except for routine fan maintenance, and is completely maintenance-free.

□Manufacturer

□Hobbywing

□Model

□HW30104000

□Continuous and instantaneous current

□200 A / 160 A

□Number of LiPo Targets

□3-8S (9-24S NiMH)

□BEC output

□Pulsed 6 V/7.2 V, 6 A

□Capacitor protection

- Yes
- Waterproof
- Yes
- Input connector
- none
- Output connector
- 6.5mm female gold-plated connector (soldered to the controller PCB)
- Motor limit
- P8S: KV≤1000 (motor size:58110), sensorless
- Programming LED card
- Active
- LED Box programming
- Active
- LCD Box programming
- Active
- WiFi module
- Active
- Programming port
- Fan port
- Software update
- Active
- Size
- 93 x 58 x 48 mm
- Weight
- 342 g
- Dedicated
- 1:5 scale Touring, Buggy, Truggy and Truck cars
