

Underwater case Telesin Dome Port for GoPro Hero 9 / Hero 10

Ref: 6972860171005

Underwater case Telesin Dome Port for GoPro Hero 9 / Hero 10 / Hero 11 (GP-DMP-T09)

Telesin GP-DMP-T09 underwater housing for GoPro Hero 9 / Hero 10 / Hero 11 / Hero 12

The Telesin brand's practical housing for the GoPro camera will allow you to take original shots above and below the water. Not only can it float above water, but it is also waterproof up to a depth of 30m. It provides a wide field of view and a light transmittance of 93%. There is also a storage compartment inside its non-slip handle where you can keep small items.

Create breathtaking underwater shots

The housing dome is made of German acrylic glass, which is distinguished by its high strength, excellent protection of the device, and also provides clear clean images. The distance between the lens and its top is 70 mm, which provides an optimal view. The accessory is equipped with special elements that prevent it from evaporating. You also do not have to worry about reflections disturbing the quality of your photos and videos. Moreover, the 180° field of view allows you to create great shots.

Reliable and multifunctional

You can use the case in several different ways. Responsible for this multifunctionality of the accessory are its buoyancy mount and waterproofness up to a depth of 30 meters. The product allows you to record unique footage on land, as well as just above the surface of the water. Thanks to that you can also take amazing underwater shots.

Practical handle

The non-slip grip of the case is made of a pleasant-to-touch TPE material. It allows you to confidently and comfortably use the accessory both on land and underwater. There is a small compartment inside where you can store, for example, keys or coins. You can also fill it with water to keep it optimally buoyant in any situation.

Carefully considered design

Mounting the case is fabulously easy, as its use. The accessory is equipped with a shutter button, thanks to which you will take stunning shots in a flash. The stainless steel components are durable and resistant to wear and tear. In addition, the adjustable length wrist holder makes the case safer to use and prevents you from losing it.
