

Regulator Hobbywing EZRUN MAX10 G2 140A

Regulator Hobbywing EZRUN MAX10 G2 140A

Ref: 6938994405546

Hobbywing EZRUN MAX10 G2 140A Regulator

The Hobbywing regulator is a specialized solution for RC modeling enthusiasts, providing full support for 1:10 scale off-road vehicles such as short course trucks and monster trucks. It allows both sensor and sensorless engine operation. It offers a wide range of 12 programmable parameters, including Turbo Timing, capable of increasing engine performance by as much as 25%. The device features compact dimensions and high performance. It is waterproof and dustproof, ensuring reliability in a variety of field conditions. It works with Hobbywing's EZRUN 3652SD/3665SD G3 series engines, providing advanced protection features for trouble-free operation.

□Manufacturer

□Hobbywing

□Model

□HW30102603

□Type

□Variable

□Continuous current

□140 A

□Max. peak current

- 880 A
- BEC voltage
- 6 - 7,4 V
- BEC current
- 5 A
- Length
- 53 mm
- Width
- 39.5 mm
- Height
- 37.2 mm
- Weight
- 120 g
- Control
- Bidirectional
- Sensor input
- Yes
- Programmable
- Yes
- Waterproof
- Yes
