

Portable Monitor Blitzwolf BW-PCM9

Portable Monitor Blitzwolf BW-PCM9

Ref: 5905316148390

Blitzwolf BW-PCM9 Portable Monitor

The Blitzwolf BW-PCM9 is a portable monitor with a 16-inch diagonal screen that you can connect to your laptop, computer, gaming console, or even an Android phone. This device can operate in various modes, such as an extension of your primary monitor or as an independent secondary display. Built-in speakers allow users to use the monitor without the need for additional audio equipment. The variety of available monitor settings, including contrast, color temperature, DCR, and night mode, make it a device that will satisfy even the most demanding users.

Display

The BW-PCM9 model features a 16-inch IPS display with an FHD resolution of 1920 x 1200 and a color scale of 72% NTSC. With a brightness level of 400cd/m² and HDR support, it delivers vivid and clear colors, allowing comfortable use even in well-lit environments. Additionally, adjustable options like brightness, contrast, color temperature, and night mode enable you to personalize the display according to your individual preferences and current needs.

Portability

The Blitzwolf BW-PCM9 portable monitor prioritizes your mobility and user convenience. Its lightweight construction, weighing only 920g, and compact dimensions (357 x 254 x 8.5mm) make it an ideal companion for travel, facilitating work or entertainment on the go. The

built-in stand at the back of the device allows for easy monitor positioning at your chosen angle, ensuring an optimal view without the need for additional stands or mounts. The included carrying case provides secure transport and storage for the monitor, protecting it from mechanical damage and dirt.

Workspace

The Blitzwolf BW-PCM9 seamlessly integrates with your digital environment, offering flexible content display options. With duplication and extension modes, the monitor can serve as a second screen, expanding your workspace or operating independently. This allows you to easily and quickly share materials without losing access to your work tools or conduct presentations without the need for a projector.

Universal Connectivity

The Blitzwolf BW-PCM9 monitor encourages the use of various types of devices. Compatibility with gaming consoles like PS5/4, XBOX ONE, or Nintendo Switch allows for seamless gaming on a larger screen without the need to connect to a TV. Additionally, the monitor can easily connect to Android smartphones, opening up new possibilities for entertainment and work. Whether it's web browsing or playing your favorite titles, the monitor adapts to your lifestyle.

Crisp Audio

The BW-PCM9 is not just a display; it's also a device that delivers clear audio through its built-in speakers. Whether you're watching a movie, playing games, or conducting a video conference, integrated sound options provide a solid audio experience without the need for external devices. Of course, for those who prefer privacy, there's also a 3.5mm audio output for connecting headphones.
