

Corded vacuum cleaner INSE I5

Corded vacuum cleaner INSE I5

Ref: 6975907030198

INSE I5 upright vacuum cleaner

Take care of clean surfaces with INSE I5. The upright vacuum cleaner uses 600 watts of power and a suction power of 16000 Pa to effectively deal with all kinds of dirt. The included brushes make it easy to clean different types of surfaces, and the 1-liter dust container reduces the frequency of emptying it. What's more, the 5-stage filtration system effectively separates dust from the air, and the lightweight design of the device allows you to conveniently vacuum curtains, high shelves, etc.

No dirt escapes its attention

Dust, hair, hair, crumbs - INSE I5 effectively removes all kinds of dirt. It uses a power of 600 W and a suction force of 16000 Pa. What's more, it has a built-in brushless motor that operates at 34000 rpm. So you can be sure that it will thoroughly remove dirt, leaving the surface clean.

Universal brush

The INSE I5 vacuum cleaner is equipped with a wide brush, with which you can clean different types of surfaces. It will work well for carpets with short fibers, wooden floors, tiles, etc. What's more, with the dedicated switch you can adjust the height of the brush fiber, depending on your needs. This solution also prevents scratching delicate surfaces.

Additional accessories included

Vacuum all sorts of surfaces without interference. The kit includes several accessories that you can use depending on the area you are cleaning. The crevice brush makes it easy to vacuum hard-to-reach surfaces, such as edges or narrow gaps between furniture. The 2-in-1 brush, on the other hand, effectively yet gently removes dirt from the sofa, curtains, desk, air vents, etc.

Tailored to your needs

INSE I5 vacuum cleaner is designed not only for efficient operation, but also for convenience. The lightweight design (about 3 kg) allows you to clean high surfaces without feeling tired, and the extendable tube allows you to adjust its length from 48 to 78 cm. This allows everyone to adjust it to their own needs. In addition, the cable with a length of about 6 m will not restrict your movements, and the included handle makes it easy to store the brushes.

You will easily keep it clean

Maintenance of the I5 will not cause you any problems. You can rinse such vacuum cleaner components as filters and dust container under running water. So you don't have to spend money on new components. By cleaning the parts regularly, you will extend the life of the product and increase its efficiency.
