Wireless Gamepad NSW PXN-P50 HALL (White)

Ref: 6948052902818

Wireless Controller / GamePad PXN-P50 NSW HALL

Need a game controller that works for both Nintendo Switch and PC? Then the PXN-P50 is just for you. The gamepad features a 6-axis gyroscope, NFC readout and Turbo functions. It allows you to program macros and change the operating parameters through a dedicated application. It draws power from a powerful battery that allows you to achieve up to 20 hours of operation on a single charge.

Many useful features

The gamepad is characterized by the use of a number of practical modes and solutions. The Wake-up function allows you to restore operation from sleep mode with the press of any button. What's more, you can also use the Turbo function, which allows you to get the effect of pressing a button multiple times with a single click. The function has Manual and Auto modes, so you can configure the settings once - and come back to them the next time you're in session.

More features

The controller is equipped with a 6-axis gyroscope, which allows it to work with Motion Control technology. In addition, you will get the ability to freely adjust the vibration intensity - separately for each handle of the controller. This will allow you to enter a higher level of immersion and ensure a perfect gaming experience.

Efficient power supply

The controller draws its power from an efficient lithium battery with a capacity of 550 mAh. It allows for up to 20 hours of operation of the device on a single charge. Power can be restored in about 2 hours. Thanks to this, the gamepad will accompany you during long gaming sessions, without unnecessary interruptions.

Dedicated application

The gamepad comes with a special companion application so you can customize its parameters. You will gain access to macro programming, change the sensitivity of the joysticks or the vibration level. From its level you will also adjust the Turbo function.
