

Intelligent Sensor Night Light Ldnio Y2

Intelligent Sensor Night Light Ldnio Y2

Ref: 6933138600016

LDNIO Sensor Night Light

LDNIO Y2 night light will make it easier for you to move around your apartment in the dark. You no longer have to worry about tripping over or hitting something! The device will provide you with soft illumination with a color temperature of 3500K. It also allows you to adjust the brightness. It is also equipped with a light sensor, so it can automatically adjust its operation to the ambient conditions. What's more, the lamp is distinguished by its compact, modern design and low energy consumption.

Built-in light sensor

Ensure optimal lighting in almost any situation. The LDNIO Y2 lamp is equipped with an advanced light sensor, so it can automatically adapt its operation to the surrounding conditions - just turn on the automatic mode. When you do this, the device will spontaneously start up when the room starts to get dark. If it gets light, the light will be turned off.

The light you need

Customize the lighting to suit your needs. The Y2 lamp generates light with a color temperature of 3500K, but you can adjust its brightness - just press and hold the button. What's more, working in automatic mode, the device remembers the last used settings and restores them when it's restarted. The lamp also allows gradual brightening or dimming of the lighting.

Improved design

The Y2 lamp is extremely compact - it won't take up much space in your home. It is also distinguished by its modern, stylish design. Flame-retardant, durable plastic was used for its housing, which ensures its durability and resistance to wear and tear. Convenient operation of the device is provided by a built-in button. In addition, the lamp is incredibly energy-efficient - forget about high electricity bills!

Many applications

This practical device will be perfect for any home. You will successfully use it in the bedroom or hallway. You can also place it near the stairs. What's more, if your child does not like darkness, the lamp will also work well in his room. All you have to do is plug it into an outlet and set the desired functions with the built-in button! Now you can easily find your way after dark and avoid a possible accident.
