Gaming Wheel PXN-V10 V2 (PC / PS3 / PS4 / XBOX ONE / SWITCH)

PXN-V10 V2 Gaming Steering Wheel (PC / PS3 / PS4 / XBOX ONE / SWITCH)

Feel like you're on a real race track and experience the thrill. The PXN-V10 V2 gaming steering wheel guarantees an immersive, realistic experience, allowing you to choose from 2 rotation ranges - 270° and 90°. The set also includes 3 pedals and a gearbox with a convenient to use shifter. The device also stands out with its wide compatibility and is very easy to operate. High-quality, improved materials were used for its manufacture. The steering wheel is stitched with red thread, which additionally enhances its visual appeal.

Wide Compatibility

Say goodbye to limitations. The PXN-V10 V2 steering wheel is compatible with many PCs and gaming consoles such as Xbox Series X / S, Xbox One (first generation), and PlayStation 4. Moreover, the device is perfectly suited for playing games like Forza Horizon 5, Dirt Rally 2.0, or Euro Truck Simulator.

Realistic Experience

Ever wondered what it's like to be a rally driver? With the PXN-V10 V2 steering wheel, you'll feel as if you're really driving a race car! The device is equipped with a dual motor and supports Force Feedback technology, allowing it to better adapt its performance to what's happening on the screen. Immerse yourself in the gameplay and give yourself unforgettable emotions!

More Possibilities with the App

Now you can adjust the operation of the steering wheel to your expectations and habits even better. Just install the dedicated PXN Wheel app! With it, you can, for example, adjust the device parameters, import settings, and create your configurations optimized for specific games. Just a few clicks on your smartphone!

2 Rotation Ranges to Choose From

The steering wheel allows you to choose from 2 rotation ranges – 270° and 900°. The first one is perfect for racing games – it will provide you with the desired speed and dynamism. The second one guarantees a more realistic experience. It allows for a 2.5 turn of the steering wheel, similar to a real car. It's perfect for playing simulators. Now you can easily tackle even the sharpest turn! To change the settings, just use a special switch.

Thoughtful Design

The set includes 2 solid clamps, with which you can stably attach the steering wheel to a table or desk. Don't worry that it will move! Moreover, thanks to the dual paddles, the device imitates solutions known from Formula 1 vehicles. So you can derive even more joy from the gameplay! There is also the possibility of easy disassembly of the steering wheel. There are also 2 functional buttons available. In addition, the product is made of high-quality materials and stitched with red thread, which creates an interesting atmosphere.

3 Pedals and Gearbox Included

With the PXN-V10 V2, you will feel like you're behind the wheel of a real car. The set includes 3 pedals, which are distinguished by high sensitivity and responsiveness, allowing you to enjoy a realistic experience of braking or accelerating. You also get a convenient to use gearbox with 6 speeds and a reverse gear. All this will provide you with even greater immersion! There is also the possibility of adjusting the pedal settings – you can easily adapt them to your habits.
