Landing gear Sunnylife for DJI Mavic 3 Pro - Gray (M3P-LG582

Ref: 5905316147454

Landing gear Sunnylife for DJI Mavic 3 Pro - Gray (M3P-LG582-GY)

Sunnylife landing gear lift for DJI Mavic 3 Pro, gray (M3P-LG582-GY)
The Sunnylife landing gear upgrade allows you to increase the height of your DJI Mavic 3 Pro by an impressive 42mm, giving your drone not only an attractive look, but most importantly, more stability during landing and takeoff. An interesting solution is the wider and perforated base and the structure of the outward-facing legs, which not only ensure safe and balanced maneuvers, but also protect the device and its sensors from dirt.

Thoughtful solutions
An elevation of as much as 42 mm makes the distance advantage between the drone and the ground evident. Why is this difference particularly important? It helps protect the drone and sensors from damage, dust and dirt during landing and takeoff. This will not only increase the lifespan of your Mavic 3 Pro, but also affect the preservation of its performance on every flight.

Hassle-free installation
Designed with precision for the Mavic 3 Pro, the landing gear upgrade was created to make installation quick and easy. In addition, you don't have to worry about the accessory blocking the drone's lower vision system. Attention to every detail guarantees full compatibility and uninterrupted access to key components of the device.

Portable and lightweight

The wide and perforated base and outward-facing leg structure not only ensure safe and stable maneuvering, but also provide an innovative folding system. In addition, the product weighs only 49g, so it will not be a burden on your drone.
