

DHC-2 BEAVER MODEL KIT-LAZER CUT

DHC-2 BEAVER MODEL KIT-LAZER CUT

Ref: 072365103054

Guillow's DHC-2 Beaver balsa plane 610mm span

A mock-up of the DHC-2 Beaver aircraft of the STOL type. It was originally used to fly over the wilderness as a transport and passenger aircraft. Produced by the American company Guillows, this minemachine is an extremely stable in flight, rubber powered model.

Includes:

- laser-cut balsa structural elements
- plastic hood, cabin (to be cut out and painted)
- modeling rubber and propeller for rubber drive
- rod for landing gear and plastic wheels
- set of decals
- covering material (Japanese paper)
- detailed plan with step-by-step assembly instructions
